This FCP promotes environmental, social and governance criteria but it does not aim for sustainable investment. It may partially invest in assets with a sustainable purpose, for example as defined by the EU classification.

OSTRUM SRI EUROPE EQUITY

Fund risks

Investing in OSTRUM SRI EUROPE EQUITY potentially involves the following risks:

- a risk linked to capital loss,
- equity securities,
- exchange rates,
- sustainability risk,
- model risk

The net asset value may vary substantially on the upside as well as on the downside because of the financial instruments held in the portfolio. Under these circumstances, the invested capital may not be recovered entirely, even if the investment is held for the recommended investment period.

The portfolio meets the requirements of the French SRI label.

The portfolio invests opportunistically in themes/factors. These latter include non-exhaustive way: the “Momentum” filter (stocks with the best stock market performance), “Value” (low-valued securities), “Low Volatility” or “RISK (least volatile securities) and “Small capitalizations” (stocks with a small market capitalization), “Quality” (company that presents most attractive profitability ratios”, “dividend appreciation” (company whose anticipates the strongest dividend growth). For each of the factors, we select securities that allow the portfolio to comply with the SRI label.

A quantitative model makes it possible to allocate between the different themes with the aim of generate a regular outperformance compared to the Stoxx Europe 600 index (Net Dividend reinvested) over a minimum time horizon of 5 years. The weight of each security in the portfolio is limited in order to ensure diversification and levels satisfactory liquidity. In addition, to control the overall risk, the portfolio invests part of its assets in a "replication" strategy which has low volatility compared to the benchmark.

Informations on the SRI label are available at <https://www.llelabelisr.fr/en>. Created by the French Ministry of Finance in early 2016, with the support of Asset Management professionals, the public “Investissement Socialement Responsable” (ISR) Label aims at giving Socially Responsible Investment (SRI) management an extra visibility with savers. It will make it easier for investors to identify financial products integrating Environmental, Social, and Governance (ESG) criterias into their investment process.

MAIN CHARACTERISTICS

Figures refer to previous years. Past performance does not guarantee future results.

	OSTRUM SRI EUROPE EQUITY	STOXX Europe 600 Index
Fundamental Characteristics		
Security Count	230	600
Market Capitalization	96 441	102 438
Dividend Yield	3.1	3.1
Price/Earnings	14.6	14.1
Price/Book	2.0	2.0
Risk Characteristics		
Total Risk	8.60	8.87
Benchmark Risk	8.87	8.87
Predicted Beta	0.96	1.00
Predicted Tracking Error	0.92	--

- The table above shows some characteristics of the fund against its benchmark. You will find in order: the number of shares held in the portfolio, the average market capitalization of the companies held, the aggregated ratios of dividend to price, price to earnings, price to net assets. Total risk is the calculated volatility. Tracking error is the difference in actual performance between a position and its corresponding benchmark. The tracking error can be viewed as an indicator of how actively a fund is managed and its corresponding risk level. The beta is a measure of how an individual asset moves (on average) when the overall stock market increases or decreases.

ESG RISK CATEGORY

CARBON INTENSITY

ESG RISK SCORE

BOARD INDEPENDENCE

Source: Ostrum, Sustainalytics, as of 29/02/2024

A company's ESG Risk Rating score is assigned to one of five ESG risk categories in the ESG Risk Rating:
Negligible Risk (Overall Score of 0-9.99 points): Enterprise value is considered to have a negligible risk of material financial impacts driven by ESG factors - **Low Risk** (10-19.99 points): Enterprise value is considered to have a low risk of material financial impacts driven by ESG factors - **Medium Risk** (20-29.99 points): Enterprise value is considered to have a medium risk of material financial impacts driven by ESG factors - **High Risk** (30-39.99 points): Enterprise value is considered to have a high risk of material financial impacts driven by ESG factors - **Severe Risk** (40 and higher points): Enterprise value is considered to have a severe risk of material financial impacts driven by ESG factors - The higher the score the higher the risk of material financial impacts driven by ESG factors. The carbon data used covers Scope 1 and 2 (Scope 3 is not included). Data from external sources and unaudited information and may require subsequent modifications.
