- Market review: Glimmers of Hope Amid Trade Tensions

by Axel Botte

- De-escalation hopes key for risk asset markets;
- Fed holds steady at 4.50% on rates amid persistent pressure from Trump;
- Long-term rates resuming uptrend, particularly in Japan;
- Sovereign and credit spreads tightening, European equities slightly higher.
- Chart of the week

Implied volatility is a measure of the market expected future volatility of a currency exchange rate from now until the maturity date.

The outbreak of a conflict between Pakistan and India appears to have revived volatility in the USD-INR exchange rate after a prolonged period of subpar volatility. The 1-month implied volatility has reverted to 6 %, close to the 2020-2022 average.

Figure of the week

324

Global debt increased by \$7.5 trillion in Q1 2025 reaching \$324.3 trillion, a new record high, driven primarily by increased government borrowing in China, France, and Germany. However, debt grew less than global GDP, resulting in a decrease in the debt-to-GDP ratio to 325%, the lowest since late 2019. Source: Bloomberg.

Market review

Glimmers of Hope Amid Trade Tensions

Financial markets are clinging to glimmers of hope that trade tensions initiated by Donald Trump may be easing, providing tentative support to risk assets. However, the risk is shifting towards currency markets and long-term interest rates.

Financial markets remain captivated by the prospect of a resolution to the trade war initiated by Donald Trump. However, the recently announced agreement between the United States and the United Kingdom appears minimalist. Indeed, the UK will still be subject to the baseline 10% tariffs imposed on all nations. A 90-day truce has been agreed to extend negotiations and roll back tariffs to 10%. While Chinese goods remain subject to the 20% levies related to the fentanyl crisis, there's a growing recognition on both sides of the untenable nature of the current situation. Chinese exports to the United States have, in effect, plummeted by 20% in April.

On the macroeconomic front, the US economy is potentially at an inflection point, although recent activity and employment data do not yet reflect a decisive shift. The Federal Reserve, under persistent pressure from President Trump, is constrained from preemptive action due to tariff-induced inflation expectations, currently pegged at 3.6% over one year, according to the New York Fed's survey. Jerome Powell has therefore maintained benchmark rates at 4.50%. April's Consumer Price Index (CPI) is expected to begin factoring in the impact of tariffs. While declining crude oil prices could cushion the blow, gasoline prices have continued their upward trajectory in April, trading around \$3.60 per gallon. Furthermore, stabilization in the Treasury market reduces the need for emergency intervention in the repo market. However, the weakness of the dollar, closely linked to the unpredictability of Trump's policy, remains a concern for the Fed, particularly as the deadline for agreeing on the federal budget looms. The surge in the Taiwanese dollar, up 6% in two days, underscores the potential for currency markets to become the epicenter of macroeconomic adjustments in the coming months, while persistent deflation in China is spurring a fresh round of monetary easing measures from the PBoC.

Upward pressure is building on interest rates, with the Fed's policy stasis translating into a 7 bp increase in the 2-year Treasury yield. While the 10-year T-note yields hover about 4,40ù, it is Japanese bonds that are exhibiting the most pronounced movements, surging 11 bps last week to 1.37%. Yields on 40-year Japanese Government Bonds (JGBs) even reached 3.40%, a considerable jump from a 2025 low of 2.57% on April 4. This bond rout could accelerate action from the Bank of Japan, potentially leading to yen appreciation. The German Bund is trading around 2.60%, in keeping with subject to global market trends. Rising risk-free rates are compressing sovereign spreads, with French OATs trading at 70 bps and Italian BTPs narrowing by 6 bps over five sessions to 105 bps. Meanwhile, credit markets are benefiting from improved sentiment, accompanied by lower volatility. Inflows into euro-denominated IG credit have resumed since mid-April, with euro IG trading at 106 bps over Bunds or 96 bps over swaps. The compression is even more pronounced in CDS indices, with the iTraxx Crossover trading under the 322 bp mark. US equity markets have seen slight declines, in contrast to modest gains in Europe, with the German DAX index marking fresh highs. European banks are up 3%, followed by automobile and oil companies, despite pressure on crude prices.

In Mexico Provided by Natixis IM Mexico, S. de R.L. de C.V., which is not a regulated financial entity, securities intermediary, or an investment manager in terms of the Mexican Securities Market Law (Ley del Mercado de Valores) and is not registered with the Comisión Nacional Bancaria y de Valores (CNBV) or any other Mexican authority. Any products, services or investments referred to herein that require authorization or license are rendered exclusively outside of Mexico. While shares of certain ETFs may be listed in the Sistema Internacional de Cotizaciones (SIC), such listing does not represent a public offering of securities in Mexico, and therefore the accuracy of this information has not been confirmed by the CNBV. Natixis Investment Managers is an entity organized under the laws of France and is not authorized by or registered with the CNBV or any other Mexican authority. Any reference contained herein to "Investment Managers" is made to Natixis Investment Managers and/or any of its investment management subsidiaries, which are also not authorized by or registered with the CNBV or any other Mexican authority.

The above referenced entities are business development units of Natixis Investment Managers, the holding company of a diverse lineup of specialised investment management and distribution entities worldwide. The investment management subsidiaries of Natixis Investment Managers conduct any regulated activities only in and from the jurisdictions in which they are licensed or authorized. Their services and the products they manage are not available to all investors in all jurisdictions. It is the responsibility of each investment service provider to ensure that the offering or sale of fund shares or third party investment services to its clients complies with the relevant national law.

The provision of this material and/or reference to specific securities, sectors, or markets within this material does not constitute investment advice, or a recommendation or an offer to buy or to sell any security, or an offer of any regulated financial activity. Investors should consider the investment objectives, risks and expenses of any investment carefully before investing. The analyses, opinions, and certain of the investment themes and processes referenced herein represent the views of the portfolio manager(s) as of the date indicated. These, as well as the portfolio holdings and characteristics shown, are subject to change. There can be no assurance that developments will transpire as may be forecasted in this material. Past performance information presented is not indicative of future performance.

Although Natixis Investment Managers believes the information provided in this material to be reliable, including that from third party sources, it does not guarantee the accuracy, adequacy, or completeness of such information. This material may not be distributed, published, or reproduced, in whole or in part.

All amounts shown are expressed in USD unless otherwise indicated.
